

Work Experience

Aug 2024 – **Capital One**, *Senior Associate Product Manager*, McLean, VA

- Present • Orchestrated multi-phased rollout reducing rewards enrollment time from 24 hours to under 2 seconds, enabling instantaneous activation for 30,000+ new daily accounts and driving measurable gains in customer satisfaction
- Spearheaded launch of enhanced rewards capabilities allowing customers to purchase premium benefits beyond base packages; led alignment across product, engineering, and data teams to scale features without disrupting existing systems
- Drove development of the Loyalty Platform, managing the full rewards data lifecycle; partnered with engineering, product, and design to build API-driven experiences enabling customers to instantly access, earn, and redeem rewards
- Led enterprise-scale performance testing to validate and optimize Rewards infrastructure, ensuring scalability and resilience ahead of increased traffic following the Discover Financial Services acquisition
- Leading migration enablement from Discover card accounts and products to Capital One's product ecosystem, ensuring seamless customer transitions and data continuity across platforms

Aug 2023 – **Capital One**, *Associate Product Manager*, McLean, VA

- Aug 2024 • Served as product owner for two engineering teams: a decisioning engine governing API access and an eligibility service powering frontend experiences for millions of customers based on user entitlements
- Built and launched a Self-Service Platform enabling API teams to dynamically enforce customer access, reducing manual entitlement configuration timeline by 40%.
- Resolved a critical access issue affecting joint bank account holders — designed a targeted remediation preserving compliance and restoring access pathways for impacted secondary users
- Designed and implemented an access control feature governing virtual card number issuance for secondary account holders, ensuring business rule integrity and enhanced platform security
- Led migration of customers from a legacy entitlements system to a modernized platform, achieving measurable latency reduction and performance improvements across dependent services

Summer 2022 **EnterpriseDB**, *Product Manager Intern*, Boston, MA

- Conducted user research on EDB Postgres Migration Portal to surface pain points; drove tool recommendations for EDB Postgres Advanced Server (EPAS) based on package support and licensing analysis
- Developed capabilities for accessing remote servers in EPAS using foreign data wrapper extensions

Summer 2020 – 2021 **Microsoft**, *Program Manager & Explore Intern*, Seattle, WA

- Led user studies and market research to refine Fluid Framework's real-time collaboration copy-and-paste experience; authored design specifications and partnered with engineers to ship an improved prototype (2021)
- Built a collaborative commenting feature and implemented a rich text editor for Fluid Framework, enabling high-level customization of in-comment text styling (2020)

Skills

Product Product Roadmapping, Stakeholder Management, A/B Testing, API Product Management, Agile/Scrum.

Analytics Data Analysis, SQL (Snowflake), Splunk, Metrics Definition & Tracking.

Technical Python, Java, JavaScript, TypeScript, React, Node.js, PostgreSQL, Git, Figma.

Education

2019 – 2023 **University of Illinois at Urbana-Champaign**, *College of LAS*

B.A. in Economics, Minor in Computer Science

Interests Illini Basketball, Chess Theory, Tennis (Especially Roger Federer), Detroit-Style Pizza
