Education

2019 - 2023 **University of Illinois at Urbana-Champaign, College of LAS**
B.A. in Economics, Minor in Computer Science

Work Experience

August 2024 - **Capital One, Senior Associate Product Manager**, McLean, VA

- Present
 - Leading migration enablement from Discover card accounts and products to Capital One's product ecosystem, ensuring seamless customer transitions and data continuity across platforms
 - Spearheading launch of enhanced rewards capabilities, allowing customers to purchase premium benefits beyond their base rewards packages. Responsible for alignment across product, engineering, and data teams to ensure new rewards capabilities scale without disrupting existing systems or customer experiences
 - Drove development of the Loyalty Platform, managing the full rewards data lifecycle. Partnered across engineering, product, and design teams to build seamless API-driven experiences that enabled customers to instantly access, earn, and redeem rewards, driving measurable gains in satisfaction and engagement
 - Directed cross-functional delivery of a reimagined enrollment experience, enabling instantaneous rewards activation for 30,000+ new daily accounts and improving customer satisfaction metrics
 - Orchestrated multi-phased rollout that reduced rewards enrollment time from 24 hours to under 2 seconds
 - Led enterprise-scale performance testing to validate and optimize Rewards infrastructure, ensuring scalability and resilience to support increased traffic following the Discover Financial Services acquisition

August 2023 - **Capital One, Associate Product Manager**, McLean, VA

- August 2024
 - Served as product owner for two technology teams: one responsible for decisioning engine governing API access, another managing eligibility service that powers frontend experiences based on user entitlements.
 - Developed Self-Service Platform enabling API teams to dynamically enforce customer access based on legal and regulatory requirements; partnered closely with users to refine UI/UX through iterative feedback
 - Collaborated on the design and implementation of an access control feature governing virtual card number issuance for secondary account holders, ensuring business rule integrity and enhanced platform security
 - Resolved a critical access issue affecting joint bank account holders by designing a targeted remediation that preserved compliance, restoring access pathways when a secondary user's account was in bad standing
 - Led the successful migration of customers from a legacy entitlements system to a modernized platform, achieving significant latency reduction and measurable performance improvements across services

Summer 2022 **EnterpriseDB, Product Manager Intern**, Boston, MA

- Conducted user research on EDB Postgres Migration Portal Demo to identify service pain points
- Provided recommendations on tools to be implemented for EDB Postgres Advanced Server (EPAS) based on package support and licensing, advised on how to integrate these tools into EPAS
- Utilized foreign data wrapper extensions to develop capabilities for accessing remote servers in EPAS

Summer 2021 **Microsoft, Program Manager Intern**, Seattle, WA

- Led user studies and market research to refine and update Fluid's real-time collaboration copy-and-paste functionality. Authored design specifications and partnered with engineers to deliver an improved prototype

Summer 2020 **Microsoft, Explore Intern**, Seattle, WA

- Developed collaborative commenting feature for Fluid Framework real-time collaboration platform
- Implemented rich text editor to allow for high-level customization and styling of text in comments
